

General Notes

1. Length of Deadmen is Typically Equal to the Length of Tank
2. Deadmen will be Fabricated in Multiple Sections
3. The Width and Thickness of Deadmen depend on: Tank Diameter, Water Table, Height, Number of Containment Sumps and Burial Depth
4. Tanks of 10' Diameter with a Capacity of 30,000 Gallons or Larger May Require Larger Deadmen Depending on Burial Depth to Offset Buoyancy
5. Steel Reinforcement Conforms to: ASTM A-615 Grade 60 Black Deformed Rebar
6. Concrete: $f_c = 4,000$ PSI @ 28 Days Minimum
